

LAPAROSCOPIC STAPLER

Tenzr™

Disposable Manual And Powered Articulating Stapler

TENZR MANUAL AND POWERED STAPLER

Tenzr™

TENZR POWERED HANDLE, MANUAL STAPLER AND RELOAD CARTRIDGES

Tenzr answers the two questions a stapling platform has to get right: does the blade cut cleanly on the fifth firing as it did on the first, and does the tissue stay put while it does. The cutter head is quench-hardened alloy, precision-hardened for lasting sharpness, so every firing is a clean, complete cut.

Reload heights are calibrated for uniform staple formation across the whole line, and a high pre-clamping force compresses the tissue before firing for consistent apposition — and the same handle takes a manual or a powered drive.

— Key Differentiators

- 01

Quench-hardened cutter

Precision-hardened alloy head holds its edge for clean, complete cuts on every firing.
- 02

Broad thickness range

Adapts to varying tissue thickness — fewer instrument changes, uninterrupted workflow.
- 03

Extended articulation

A wider rotation angle reaches into difficult operative fields with precise control
- 04

Calibrated reload height

Uniform staple geometry across the line for a consistent anastomosis
- 05

High pre-clamping force

Superior pre-fire compression for optimal tissue apposition, every time.

CODE	CARTRIDGE	STAPLE LEG LENGTH	STAPLE LINE	STAPLES
FZTR 60W	 White	2.5 mm	61 mm	88
FZTR 60B	 Blue	3.5 mm	61 mm	88
FZTR 60G	 Gold	3.8 mm	61 mm	88
FZTR 60GR	 Green	4.1 mm	61 mm	88

Staplers: FZTRM 60SH Manual Short (280 mm) · FZTRM 60XL Manual XL (440 mm) · FZTRP 60XL Powered Handle (440 mm). All reloads carry a 61 mm staple line of 88 staples.

Secure and stable healthcare products

FourZone Healthcare develops and manufactures devices that improve patient outcomes and advance minimally invasive surgery. Everything in this catalogue is made to one standard, whether it is used in the first minute of a case or the last.
